

Integrated Management System Policy

Akcoat considers the protection of security, health, and the environment, ensuring resource efficiency, and continuous improvement as a fundamental part of its strategy. Working continuously for a sustainable future, producing innovative products, continuously improving our technological infrastructure, and prioritizing them in all our activities, relationships with stakeholders, and commercial activities are our key priorities.

With a corporate sustainability perspective, we have adopted the following topics as our responsibilities and principles that we will not compromise:

- Developing sustainable products and services that add value to our stakeholders by following changing market conditions and customer expectations.
- Continuously working to be the preferred solution partner for our customers' current and future needs.
- Complying with national and international legal regulations and other obligations in the geographies where we operate.

- Continuously improving the quality of our business processes, products, and services, and reducing our risks.
- Minimizing our impact on health, safety, and the environment throughout our entire supply chain.
- Continuously improving energy efficiency and striving to save resources in designing our activities and supplying energy-efficient products and services.
- Researching, developing, and implementing technology, alternative raw material sources, and working methods to continuously improve our Quality, Environmental, Health, Safety, and Energy performance and management systems.
- Engaging in two-way communication and cooperation with all internal and external stakeholders to ensure our quality, protect the environment, and ensure the safety of our operations, prioritizing the health of our employees to prevent injuries and health impairments.

As Akcoat, our most important commitment and the greatest assurance for our future is the dedication and active participation of all our employees in adhering to these principles and having a human-centric approach, respecting universal values, embracing continuous learning, and caring about the future of the world.

(Date of Enactment: 10 June 2016)
